

COVER LETTER

21/05/2026

To,
Editor-in-Chief,
International Journal of Science and Research Archive

Subject: submission of new manuscript for evaluation

Dear Sir/Madam,

I am enclosing herewith a manuscript entitled “ **EduMitra : AI for Smarter Student Services**” for possible evaluation as a **Research article** in International Journal of Science and Research Archive.

This paper is a valuable addition to the scientific literature because it demonstrates the practical application of Artificial Intelligence and Natural Language Processing in the education sector. The proposed AI-powered chatbot system addresses real-world challenges faced by students and educational institutions by providing instant, accurate, and personalized guidance related to admissions, courses, scholarships, and placements. By integrating modern technologies such as Google Gemini API, React.js, Spring Boot, and MySQL, the system improves accessibility, reduces administrative workload, and enhances user experience. The study also highlights how intelligent conversational systems can support digital transformation in educational counselling services..

All of the authors declare that they have all participated in the design, execution, and analysis of the paper, and that they have approved the final version. Additionally, there are no conflicts of interest in connection with this paper, and the material described is not under publication or consideration for publication elsewhere.

Thank you.

Sincerely,
Gargi Kekre
